Workshop/Presentation  
Emergency Response to a Pandemic Outbreak

#### OVERVIEW:

##### Audience:

The workshop will prepare Student Life Directors how to respond to an emergency pandemic outbreak. Participating offices in the workshop are high contact in nature and involved in the daily life of students. These departments include Residence Life, Hospitality Services, Campus Safety, and Student Activities.

##### Purpose:

Given the high level of responsibility these positions entail, these professionals need to be prepared to support student health and safety. In addition, these offices must be aware of potential legal and ethical issues in order to effectively respond. To that end, workshop presenters will utilize an interactive training approach to provide participants the opportunity to navigate a number of online resources and locate specific information within them.

##### Learning Outcomes/Objectives:

- Understand implications of a pandemic, potential impact of a disease outbreak through history and projections
- Know each department's role in implementing preventative and responsive measures
- Identify potential legal and ethical issues when responding to a pandemic
- Identify and Navigate online Resources in order to effectively educate and inform students
